Subject Fw: 33777 Valley Center Road Data

Kristie/Eric - hopefully this is all in. Mike Schweensen will be reviewing and preparing a summary before the contractors final report.

Let's set a meet to discuss.

Subject Re: 33777 Valley Center Road Data

Mr. Schwennesen-

I believe at this point, we've gotten all the results back. Those analyses you mentioned (VOCs, SVOCs, metals, etc.) are included in the "Weck lab" files (those are the sample results that came from the sister lab)- I thought I attached them also, but I apologize if I didn't. They were originally in a zip file, so I will try and attach them now just as individual PDFs (I'm also going to reattach the asbestos and dioxin results because they were in a zip file too- just in case). There should now be four separate pdf files attached to this email. Also, the Weck lab renamed the samples with their own identification numbers, so they do not read BP and GW and are not reported in any particular order that I can figure, but are all in the Weck file with "FINAL" in the name. I will also attach the chain of title they sent to me. I'm sorry my knowledge about some of these specific analytes is limited, but I believe I saw at least 1,1,2- trichloroethane (try page 6 and 11 of the 31). Sorry for the inconvenience, and please let me know if there's anything else I can help with or if you do not receive all four pdf files. Thanks.

Jody

Hi Jody,

Craig forwarded the data to me, and I found that the following analyses are missing. Are they still pending from the lab, or are they available for forwarding to us?

>

- all the water well analyses (BP-9 and GW-9) except for fluoride, nitrate (as N), and cyanide. That is, VOCs, SVOCs, metals, pesticides, PCBs, etc. are missing.

>

I also do not see 1,1,2-trichloro-1,2,2-trifluoroethane (aka trichlorotrifluoroethane) in the VOCs analytical suite for the air blank water sample, and am concerned that that analyte may also end up missing from the water analyses, when made available.

I appreciate any assistance you may be able to provide,
